Hi Jen, the DwCA is for new records.
The tab-delimited text is for existing records.

For review.
Thanks,
Eli

Hi Jen, please disregard these files. I will submit an updated version shortly.

Anyway, the problem was that, only 'habitat' was included. The 'present' is missing.

Thanks,
Eli

These look good! I shuffled column headers in the existing records file. I meant http://purl.obolibrary.org/obo/IAO_0000009 for the labels column- which I think is where you put it in the DwC-A. Everything else looks great! We may eventually remove the Page ID and measurementValue columns from the existing values file; technically they're not needed- but Jeremy might like them for validation, at least in the beginning.

Thanks!

Jen
